SUMMARY

CSE graduate with hands-on Android development experience building native Java applications with Firebase, MVVM architecture, and applied design patterns (Singleton, Factory, Observer, Adapter), backed by JUnit/Espresso testing and GitHub Actions CI. Strong foundations in Data Structures & Algorithms (Max Codeforces Rating: 1257), OOP, and RESTful API integration connecting mobile clients to back-end services. Also experienced in cross-platform Flutter and back-end development with Java Spring Boot, MERN, and Laravel. Known for clean coding practices, quick adaptability, and the ability to communicate technical concepts clearly and effectively.

EDUCATION

Khulna University of Engineering & Technology
Bachelor of Science in Computer Science and Engineering

Khulna, Bangladesh
Mar 2022 – Jul 2026

TECHNICAL SKILLS

Languages: Java, Kotlin, C++, Python, JavaScript, PHP

Mobile: Android SDK (Java), Firebase (Auth, Firestore, Cloud Storage), Volley, Gradle (Kotlin DSL), MVVM, ViewBinding, Navigation Component, Flutter

Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

Web & Backend: Spring Boot, Spring Security, JPA/Hibernate, React.js, Next.js, Node.js, Express.js, FastAPI, Laravel 11, REST APIs

Databases: Firebase Firestore, MongoDB, MySQL, PostgreSQL (pgvector)

Testing & DevOps: JUnit, Mockito, Robolectric, Espresso, Git, GitHub Actions CI/CD, Linux/Bash

Communication Skills: English (Full professional and Academic proficiency), Bengali (Native proficiency)

EXPERIENCE

Full-Stack Web Developer (Part-time)

Aug 2025 – Present

TechnoPLUS IT – Remote (Aus)

- Built and maintained a Laravel 9 + Vue.js LMS using Porto/Apiato modular architecture, applying OOP and design patterns (Repository, Service, Observer) across 15+ domain containers
- Independently researched and implemented a custom H5P interactive content integration from scratch, and designed RESTful APIs with role-based access control
- Implemented relational database tables with ordered pivot tables, SoftDeletes, and JSON metadata columns to support a flexible multi-content-type lesson structure

PROJECT EXPERIENCE

PharmaPlus – E-Commerce Pharmacy App (*Android, Java, Firebase*)

2024

- Built a dual-role (customer + admin) native Android e-commerce app in Java with Firebase Authentication, Cloud Firestore, and Cloud Storage, delivering product catalog, cart, multi-address checkout, order history, and an admin catalog-management panel
- Architected the app with MVVM (LiveData/ViewModel, ViewBinding, Navigation Component) and applied Singleton, Factory, Observer, and Adapter design patterns; consumed REST endpoints via Volley to connect the app to back-end services
- Wrote unit and instrumentation tests (JUnit, Mockito, Robolectric, Espresso) and automated builds through a GitHub Actions CI pipeline (Gradle Kotlin DSL, minSdk 28 / targetSdk 34)

Edge Intelligent SmartCane – Assistive App for the Visually Impaired (*Flutter, Kotlin, YOLOv11n*)

2025 – Present

- Developed a cross-platform (Android/iOS) Flutter app that runs real-time on-device object detection through the device camera to assist blind and visually impaired users during navigation
- Integrated a fine-tuned YOLOv11n detection model with native Android (Kotlin) and C++ components, converting detections into audio alerts and haptic feedback for accessible, hands-free guidance

Moviecrates – AI Movie Recommender (*Java, Spring Boot REST Backend*)

Jul 2026

- Designed and built a Java Spring Boot REST API (Spring Security, JPA/Hibernate, Flyway, PostgreSQL) with backend-owned Google OAuth2 login and stateless JWT sessions – the class of authenticated back-end services a mobile client consumes
- Enforced per-user data ownership at the repository layer to structurally prevent IDOR, integrated Gemini embeddings and LLM generation over pgvector for recommendations, and verified the security and AI seams with JUnit integration tests

AI-Powered Learning Platform (*Next.js, FastAPI, LangChain*)

Jan 2026

- Developed a university course assistant with AI-powered tutoring and intelligent content search using LangChain and vector embeddings
- Engineered a FastAPI backend with Supabase (PostgreSQL) and row-level security, supporting real-time updates and separate role-based portals for students and instructors

ACTIVITIES

BUET CSE Fest 2026 Hackathon – Finalist | Dhaka, Bangladesh | Jan 2026

BITFEST 2025 – Executive Member | Khulna, Bangladesh | Dec 2024 – Jan 2025

SGIPC (Special Group of Interest in Programming Contest) – Campaign Editor | Khulna, Bangladesh | Aug 2023 – Present

Intra KUET Programming Contest 2023 – Best Team 2k20 Award Winner | Khulna, Bangladesh | 2024

Inter-University Programming Contests (IUPC) – Participant | KUET | 2025
