*TechnoPLUS IT – Remote (Aus)*

- Built and maintained a Laravel 9 + Vue.js LMS using Porto/Apiato modular architecture, applying OOP and design patterns (Repository, Service, Observer) across 15+ domain containers
- Independently researched and implemented a custom H5P interactive content integration from scratch, and designed RESTful APIs with role-based access control
- Implemented relational database tables with ordered pivot tables, SoftDeletes, and JSON metadata columns to support a flexible multi-content-type lesson structure

## PROJECT EXPERIENCE

### MemeGrove – Social Media Platform (Laravel 11, MySQL)

May 2024

- Designed and built a full-featured social platform from scratch with user authentication, image upload pipeline using Intervention Image, likes, comments, following system, and real-time event-driven notifications
- Implemented a custom trending algorithm combining engagement metrics with time decay, alongside tag analytics, infinite scroll pagination, and an admin moderation dashboard

### Movierates – AI Movie Recommender (Java, Spring Boot, Next.js / React 19, PostgreSQL)

Jul 2026

- Built a multi-user movie recommendation platform with Next.js/React frontend and Spring Boot REST API backed by PostgreSQL + pgvector; containerized with Docker and deployed to Azure Container Apps
- Engineered stateless Google OAuth2 auth issuing httpOnly JWT cookies, strict per-user repository boundaries to structurally eliminate IDOR risks, prompt-injection defenses, and per-user sliding-window rate limiting

### AI-Powered Learning Platform (Next.js, React 19, FastAPI, LangChain)

Jan 2026

- Developed a university course assistant with AI-powered tutoring and intelligent content search using LangChain and vector embeddings
- Engineered a FastAPI backend with Supabase (PostgreSQL) and row-level security, supporting real-time updates and separate role-based portals for students and instructors

### Automated Healthcare System (MERN Stack – React.js, Node.js, Express, MongoDB)

Nov 2024

- Built a full-stack healthcare platform with React.js, Node.js, Express, and MongoDB featuring doctor appointment booking, pharmacy cart, blood donor search, and emergency ambulance services
- Implemented JWT-based authentication with bcrypt password hashing, role-based access control (Admin, Moderator, User), Cloudinary image uploads, and modular MVC RESTful API backend
